We Believe in Doing Things Right!

This is what that means:

Our Patients:

- **Customized Care:** We take the time to know and understand each patient so that we can render care ideally suited to their personal health goals and total-body health. Once we understand each person's unique needs and preferences, we can create the highest level of service. Dentistry tailored to the individual provides the most caring and respectful approach to treatment.
- **Prevention:** We create a strategic prevention plan so that each patient can achieve a self-sustaining state of health and stability. This allows us to minimize the need for restorative dentistry and unexpected dental needs.
- **Treatment of Occlusion:** We have devoted considerable time and energy to understanding and treating occlusal disease, the often neglected condition responsible for significant dental destruction and discomfort. This level of training and expertise is needed for everything from a simple filling to a complete, full-mouth rehabilitation with stabilization of the dental joint (TMJ). Training in occlusion allows us to deliver treatment that is in harmony with the joint and the bite, and also allows us to treat total-body health issues such as headaches, muscle pain, earaches, joint pain, chewing dysfunction, and facial tension. By honing this unique skill-set, we can offer treatment that is long-lasting, comprehensive, and beautiful.
- **Natural:** We design our dental treatment in observance of the established principals observed in perfectly functioning natural systems. This restorative philosophy (Oral Bioesthetics) allows us to deliver an unparalleled level of quality and beauty modeled after *nature*.
- **Lower Expense:** By focusing on getting it right the first time and achieving a state of health, our patients can expect fewer dental emergencies and needs over their lifetime, thus saving time and money.

Our Dental Team:

- **Professional Development:** We support and encourage one another along the path to professional excellence. By training and educating ourselves as a team, we can gain from one another's strengths and assist each other as we strive to be the best in our field. We take great care to ensure that every member of our team is supported to achieve the vision of excellence that drives each one of us.

Our Community:

- **Network of Excellence:** We strategically ally ourselves with the most skilled and knowledgeable specialists who support our vision of technical excellence and professional ethics. Everyone we work with, from our master laboratory ceramists to our certified, board-specialists to our reputable suppliers is committed to the same level of excellence.
- **Lead by Example:** We strive, in everything we do, to be a paragon of excellence in our dental community. We believe in our profession and in the power of dentistry to change a person's life. We support and encourage other practices to return to the honorable and traditional style of dental practice, where the dentist is devoted to the patient, and not corrupted by the influence of dental insurance companies and the pressures to make shortsighted decisions at the expense of quality and longevity.
